

# MONSTER CAREER CENTER

Matching job seekers with jobs and employers with the right talent fuels economic growth and prosperity. It is important for people to have access to resources they need to expand their skills and advance their career. It is equally important to connect employers with the right talent. Monster Career Center was created to give Workforce Development Boards (WDBs) a job-matching site that is highly reliable, easy to launch, and flexible. This solution empowers WDBs to effectively serve Workforce Innovation and Opportunity Act (WIOA) core programs such as adult and dislocated workers, youth workforce activities, vocational rehabilitation, and training and services, and more. Monster Career Center is convenient, easy to use, and helps put people to work faster than ever before.

### ENGAGING AND FLEXIBLE

Flexible enough to fit your unique organizational goals and image, Monster Career Center is a configurable employment portal that intelligently matches participants with resources, job seekers with available jobs, and employers with the right talent all through an engaging, interactive experience on their desktop, tablet, or mobile device.

### TOOLS FOR JOB SEEKERS AND EMPLOYERS

Monster Career Center gives job seekers a wealth of career planning tools including a resume builder, career-path advice, education and training materials, budget calculators, skills assessments, and more. Monster Career Center uses award-winning, multi-patented 6Sense® semantic search technology to dramatically reduce the time required for employers to accurately identify the right talent to fill jobs, and allow job seekers to find ideal jobs that match their skills and experience. Unlike most traditional search engines that rely on keyword-based searching, 6Sense® powers Monster's resume search and job matching with conceptual- and contextual-based matching. 6Sense® understands alternate names for titles, related skills, relationships between concepts, and punctuation variations.

Job search results page.

**Monster Career Center is built on our highly configurable platform and seamlessly integrates with countless workforce solutions.**

6Sense® semantic search technology understands concepts and context. It also helps employers rank candidates.

### THE POWER OF 6SENSE® SEMANTIC SEARCH TECHNOLOGY

- Search through expansive resume databases
- Help employers sort, rank, and manage resumes to find the best candidates for each opening quickly
- Compare up to five resumes side by side
- Pull resumes from searches or applicant pools

Monster Career Center integrates seamlessly with existing resume databases and offers several options for remote job posting and candidate management.

### IMPROVING LIVES WITH ON-THE-GO TECHNOLOGY

Monster Career Center offers job seekers an attractive responsive design that adapts to the screen of their chosen device. Whether at home, or on-the-go, with Monster Career Center, job seekers can access valuable resources to develop their current career, explore and plan a new career path, or actively search for and pursue new career opportunities that match their skills.

### HELP EMPLOYERS DO THEIR JOB FASTER AND BETTER

Monster Career Center drives employer engagement by providing tools to overcome an employer's biggest challenge – finding skilled employees quickly and efficiently. Using 6Sense®, Monster Career Center dramatically reduces the time required to search through expansive resume databases helping employers sort, rank, and manage resumes to help find the best talent for each opening. Employers can even compare up to five resumes side by side.

### EASY TO MANAGE, EASY TO MEASURE

As WDBs continue to tackle WIOA requirements, Monster Career Center serves as a valuable tool to facilitate communication and business outreach. Monster Career Center is the only solution hosted on our proven and reliable platform, Monster.com. Monster Career Center Application Program Interface easily connect with your existing online workforce solutions tools. It provides the visibility and reporting support you need to assess successes and demonstrate results within the job seeker, employer, and partner communities.
