

Employer Brand on Demand

Combat talent scarcity with a professional page and traffic boost tailored to your recruiting needs

When you need to attract and hire the right candidates quickly in a talent scarce market, you need to demonstrate the “why” behind your organization in a clear and concise way. However, this often means lengthy lead times and heavy reliance on internal resources to build out a dedicated site – which results in a longer time-to-fill. Recruiters need an effective approach to target the right candidates – both active and ideal passive candidates, with an engaging experience that converts them into applicants.

Monster will create a professional landing page that drives more applicants. Promote specific roles or drive priority initiatives like diversity hiring. With our targeted media campaigns, you will reach both

active and hard-to-find candidates across the web, combined with exposure to active job seekers on Monster. We will have you up and running quickly with no setup fees to start driving performance, fast.

At Monster, we create platforms where stories can live with purpose. From using a specific word in a call-to-action to the imagery selection, we do everything to create a better user experience, so that you can promote your employer brand, share your content, and connect with people who have the potential to become serious applicants.
