

MONSTER WORKS:

A Modern Integrated Labor Exchange and Case Management Solution

MONSTER
GOVERNMENT SOLUTIONS

*Today's workforce challenges demand unprecedented levels of engagement and collaboration between government, Workforce Development Boards (WDBs), employers, educators, and job seekers to achieve workforce mission success. If you're in the business of getting the best outcomes for the people you serve, you need a platform powerful enough to get the job done. **Enter Monster Works:** a dynamic labor exchange and case management solution from industry leader Monster Government Solutions that will keep you on the leading edge of workforce development and better serve and engage your customers.*

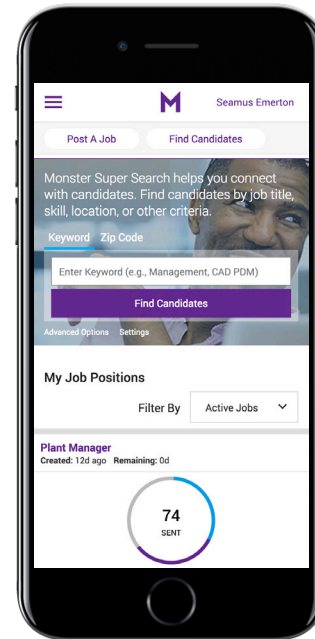

MONSTER WORKS FOR:

Job Seekers — Provides access to a vast array of career planning tools, including a resume builder, career path advice, education and training materials, budget calculators, skills assessments, and more. It empowers job seekers to find jobs, explore careers, and advance their employability.

Employers — Taps into a single source of talent with Monster's robust resume database, Monster.com, and Monster's award-winning and patented semantic search technology, 6Sense™. These tools enable employers to find the right people faster.

Workforce Development Boards — Leverages a secure and powerful case management workflow and reporting platform with real-time visibility into profile information and past job search activity. Streamlines WIOA reporting and delivers case management tools that WDBs need to engage and deliver services to job seekers, employers, and partners.

State-Level Workforce Agency — Ensures peace of mind by providing just the right amount of configurability at the state and WDB level as well as a system that complies with federal reporting requirements. Performance reporting is built-in, and can create custom views of workforce data.

Monster Works enables employers to find the right people faster with patented semantic search technology and mobile-first design.

MONSTER WORKS DELIVERS:

- Innovative, reliable technology getting more people to work faster.
- Workforce system expertise resulting in enhanced solution efficiencies.
- Unique Monster tools driving employer engagement.
- Trusted Monster brand accelerating user engagement and adoption.
- Integrations allowing for a highly extensible solution.
- A design that is intuitive and easy-to-use.
- Streamlined workflows empowering staff to focus on people's needs.
- Functionality that can be configured, as needed.

EASY-TO-USE AND ENGAGING

The Monster Works platform is designed to help states and WDBs reach and engage its workforce with an easy-to-use and mobile-first design technology. This platform is specifically aligned with state workforce development missions to provide job seekers with access to training and educational opportunities, as well as the support needed to obtain sustainable employment. Monster Works integrates online, self-service, and on-demand tools with one-to-one services allowing states to powerfully engage job seekers and employers. It also enables regional WDBs to most effectively serve clients and to support economic expansion and to develop the talent of the nation's workforce.

SAVES TIME AND MONEY

Monster Works is designed to share data and pre-populate information wherever possible, thus reducing or eliminating the need for duplicate entries. Its purpose-built case management functionality combines strong user-centric design with automation, so that case workers spend less time inputting data or clicking through modules, and more time focusing on helping customers, while maximizing available funding and resources.

STREAMLINES REPORTING

Monster Works meets all WIOA Title I and III federal and state reporting requirements (e.g., Wagner-Peyser, WOTC, TAA), and is designed for timely and accurate reporting. Monster Works effectively aligns with WIOA core programs such as adult and dislocated workers, youth workforce activities, vocational rehabilitation, and training.

CONFIGURABLE AND OPEN

Designed with an open and configurable architecture, Monster Works readily integrates with external programs and data sources. The result is a streamlined and comprehensive Workforce system with functionality and reporting capabilities to enable collaboration and visibility among all participating government departments, WDBs, employers, educational institutions, partners, and staff. Our system can readily integrate with any other system also designed with an open architecture allowing for a more seamless user experience. That means minimal costly programming changes — and more efficiency and overall value from your technology investment!

WHY MONSTER GOVERNMENT SOLUTIONS?

As a wholly owned subsidiary of Monster Worldwide, Inc., Monster Government Solutions pioneered online hiring for the public sector 15 years ago, and continues to develop and implement innovative solutions and services that help government agencies to find, hire, and develop their workforce. Monster Worldwide, Inc. is globally-recognized, with a 20-year history of successfully connecting people to jobs. Using the Monster brand delivers confidence and promotes usage among all stakeholders. Because Monster Works is developed by workforce subject matter experts and backed by a parent company, we have the resources and experience necessary to configure, deploy, and implement solutions that are scalable, comprehensive, secure, and reliable.
